Subject: Gunshy Sampling
Attachments: [Gunshy Sample Locations Colleted 10-23-19 .jpg](#)
[Gunshy Manor Proposed Sample Locations.pdf](#)

Hi Joanne,

Due to wet conditions encountered during the sampling work conducted by EPA's contractor on Wednesday, October 23, our contractor was not able to complete the needed work. EPA would like to have its contractor return to the Gunshy Manor property for a day during the week of November 4-8. Later in the week would be best as this would allow for more preparation time.

Attached are two diagrams. The first one shows where samples were taken on October 23 on the southern portion of the property, and the second one shows the remaining proposed sampling locations on the middle and northern areas of the property.

EPA's contractor will be taking the remaining samples by hand auger rather than using heavier equipment so as to minimize any impact to the property.

Please let me know a day next week for completion of the sampling that would be acceptable to your client.

Thank you,

Richard
